

Power Supply Unit

SOLAXX is pleased to introduce the **Saltron[®] Retro**, a salt chlorine generator for inground and aboveground pools.

This self-contained purification system utilizes a natural process to generate pure chlorine. The electrolytic process uses a very low concentration of salt (less than a teaspoon per gallon) and generates free chlorine. The chlorine continuously kills bacteria and algae and then reverts back to salt. This indefinite cycle leaves the water feeling silky, soft, refreshing and sparkling clear. Saltron[®] is easy to install, economic, and fully automatic.

Saltron[®] Retro

With Saltron[®] Retro you'll see the benefits of natural chlorine:

- No more purchasing, transportation or storage of chlorine.
- No more skin irritations and itchy red eyes.
- No more faded bathing suites.
- No more harsh chemicals in your swimming pool.

SPECIFICATIONS:

Pool Size: Up to 20,000 Gallons

Input: 100-240 VAC
50-60 Hz 1.5 Amps

Output: 20 VDC @ 3.0 Amps

Chlorine production: 0.4 lbs. / day
8 grams / hour

Dimensions: 300mm x 230mm

Warranty: 1 year

A step above the competition:

- **Easy installation** on new and existing pools - no plumbing required.
- **Programmable** digital timer to adjust chlorination time.
- **LED indicator lights** illuminate for easy salt level reference.
- **Commercial grade titanium** cell plates coated with precious metals.
- **Reverse polarity** keeps cell clean and prevents scaling.
- **Clear cell housing** allows user to easily inspect cell for scaling.
- **Switch-mode** power supply supplies smooth current to cell resulting in longer lifetime.
- **Critical fault protections** with automatic shut-down.
- Helps keep a consistent **Free Chlorine residual**.

Preparing your pool for a Saltron[®] system is easy. Simply bring the salt level to 3,000 ppm and begin sanitizing.
